DETAILED ACTION

1. Amendment filed on May 16, 2008 has been entered.
2. Claims 2-33 have been canceled. Claim1 is pending.

EXAMINER'S AMENDMENT

3. Authorization for this examiner's amendment was given in a telephone interview with Mr Eustace Isidore, Registration Number 56,104 on June 9, 2008.
4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

CLAIMS

In claim 1,

Line 19, replace "said" with a

line 19, replace "." with ;

line 20, inserted after "said" , virtual

line 51 replace "." with ;

Reason For Allowance

5. The following is an examiner's statement of reasons for allowance:

As per claim 1, the particular combination of limitations including when a request is received, analyzing said request to determine if said request contains the virtual directory appended to the URL, when said request does not contain the virtual directory, initiating an invocation of the web services application corresponding to said URL and providing said requestor with access to functionality of said web services application, when a request is received with said virtual directory appended to a universal resource locator (URL) of the web services application, recognizing said client request as a request to retrieve one of said files, wherein said step of recognizing said request as a request for retrieval of a file further includes: identifying whether a filename is appended to said virtual directory; and when no filename is appended to said virtual directory, returning an outermost file from said pre-specified directory to said requestor. wherein, when a filename is appended to said directory: determining whether said filename has a correct predefined pattern, when said filename has said correct predefined pattern, searching said pre-specified directory for said filename, and when said filename is found, returning said copy of said file from said pre-specified directory to said requestor, registering said filenames and predefined patterns with the applications server, wherein said applications server recognizes that a request for a file having said pattern is found at a pre-established directory, encoding an automatic response by said applications server, wherein said applications server automatically forwards all requests for

Art Unit: 2167

files with said predefined pattern to the web container hosting the web services application, providing the file pattern to a requestor during a publication of the web services application's wsdl (web services definition language) document, adding an associated wsdl accessing URL-pattern at a runtime initialization phase for URL pattern for each registered web services application, wherein said adding step includes: placing all wsdl files within a single predefined directory; and enabling all soap addresses to only appear in an outermost file, providing dynamic servlet registration, wherein when a web container runtime is initialized~ a corresponding wsdl accessing URL-pattern is generated for each URL mapping of web services servlet, modifying said servlet to be able to recognize and handle the new URL pattern via a wsdl search algorithm, implementing said search algorithm according to established criteria from among (1) maintaining referential integrity among filenames and their root directory, (2) non-modification of original existing deployment definitions files, and (3) non-modification of original wsdl files, storing each of said files with predefined file patterns at a pre-specified directory path within said web container, which path is associated with an endpoint directory of said web services application, wherein all file searches occur within said pre-specified directory and subdirectories affiliated therewith, generating a correct Simple Object Access Protocol (SOAP) address for said file, returning said SOAP address along with said copy of said file to said requestor, returning an error message indicating that said filename does not exist within said pre- specified directory when the filename does not have a correct predefined pattern and returning an outermost file from said endpoint directory to

said requestor and messaging said requestor that the filename does not exist when the filename does have a correct predefined pattern but is not found within said pre-specified directory is neither anticipated nor suggested by the prior art of record.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
